.....

Description of construction:

- Materials
- Dimensions

Description of construction method (provide as much detail as possible)

.....
.....
.....
.....

Signature of Applicant:

Date:

Information to Applicants

The application form needs to be filled in and submitted to the Island Government. In order to be processed the form must bear a Naf 5.00 stamp available at the Island Receiver's Office (Eilandsontvanger). If the permit is approved you will need a second Naf 5.00 stamp for the permit itself.

The following information should be submitted along with the application form:

- Letter describing in detail the reason for construction, dimensions, the exact location of the construction and the method of construction;
- Plan including (kadastral) reference points;
- Building plan on scale;
- Detailed description of the method through which the work will be executed and precautions taken to prevent potential damage to the underwaterpark;
- Photographs of the location and/or construction;
- Proof of premises ownership (eigendomsakte);
- Proof of payment of "leges"(Naf 25,- payable to the Island Receiver's Office);

Your application will not be processed in case a the application is not complete.

Note that in case a permit is granted you will need to apply for a building permit (Bouw- en Woningverordening Bonaire (A.B. 1961, no.17)) and apply to the minister of Finance (Curaçao) for permission to rent the sea bottom from the Central Government where the proposed construction is to be built.

Please read carefully before completing the application form

Reason construction is necessary: The necessity for building the construction must be made apparent. Also describe the intended use of the construction. Please note that the Island Government will generally not consider application for private piers.

Location: Please be specific about the location of the construction. You will need to submit a scale plan indicating the proposed location of the construction including kadastral reference points and co-ordinates. Please note that Island Government will generally not consider piers within the marine reserves, on Klein Bonaire, within 200m of an existing pier or piers north of Hato and south of Belnem.

Construction details: Please provide a detailed description of the type of construction you require, the materials you will use and any other relevant information. In addition, you will need to submit scale plans of the construction itself. Please note that filled piers and/or T or L shaped piers will not be considered by the Island Government.

Method of construction: Please describe the building method and the machinery to be used. Please note that piers and platforms should consist of a hard section (pillars and frame) and a soft section (demountable wooden deck). In addition, construction boats will generally not be considered by the Island Government of Bonaire.
